

Dear Customer,
This nebuliser is an aerosol therapy system suitable for domestic use. This device is used for the nebulisation of liquids and liquid medication (aerosols) and for the treatment of the upper and lower respiratory tract.
This device has been specifically designed to make medicine more pleasant for children, by ensuring all the quality and safety standards of Microlife products. Please read through these instructions carefully so that you understand all functions and safety information. We want you to be happy with your microlife product. If you have any questions, problems or want to order spare parts please contact your local Microlife-Customer Service. Your dealer or importer will be able to give you the address of the Microlife dealer in your country. Alternatively, visit the internet at www.microlife.com where you will find a wealth of invaluable information on our products.
Stay healthy – Microlife AG!

- 1. Explanation of symbols
- Electronic devices must be disposed of in accordance with the locally applicable regulations, not with domestic waste.
- Read the instructions carefully before using this device.
- Type BF applied part
- Class II equipment
- Serial number
- Reference number
- Lot production identification number
- Manufacturer
- ON
- OFF
- Protection against solid foreign objects and harmful effects due to the ingress of water.

CE Marking: CE 0123 CE Marking of Conformity

2. Important Safety Instructions

- This device may only be used for the purposes described in these instructions. The manufacturer cannot be held liable for damage caused by incorrect application.
- Retain instructions in a safe place for future reference. Do not operate the unit in presence of any anesthetic, mucus-inflamable with oxygen or nitrogen protoxide. This device is not suitable for anaesthesia and lung ventilation.
- This device should only be used with original accessories as shown in these instructions.
- Do not use this device if you think it is damaged or notice anything unusual.
- Never open this device.
- This device comprises sensitive components and must be treated with caution. Observe the storage and operating conditions described in the Technical Specifications section.
- Protect it from:
 - water and moisture
 - extreme temperatures
 - impact and dropping
 - contamination and dust
 - heat and cold
- Comply with the safety regulations concerning the electrical device and in particular:
 - Never touch the device with wet or moist hands.
 - Place the device on a stable and horizontal surface during its operation.
 - Do not pull the power cord or the device itself to unplug it from the power socket.
 - The power plug is a separate element from the grid power; keep the plug accessible when the device is in use.
- Before plugging in the device, make sure that the electrical rating, shown on the rating plate on the bottom of the unit, corresponds to the mains rating. In case the power plug provided with the device does not fit your wall socket, contact qualified personnel for a replacement plug with that of a suitable one. In general, the use of adapters, simple or multiple, and/or extension cables is not recommended. If their use is indispensable, it is necessary to use types complying with safety regulations, while ensuring that they do not exceed the maximum power limits, indicated on adapters and extension cables.
- Do not leave the unit plugged in when not in use, especially if the device will be used when it is not in operation.
- The installation must be carried out according to the conditions of the manufacturer. An improper installation can cause damage to persons, animals or objects, for which the manufacturer cannot be held responsible.
- Do not exceed the power load of this device. In case of a power load damage, contact a technical service center authorized by the manufacturer for its replacement.
- The power supply cord should always be fully unwound in order to prevent dangerous overwinding. Before performing any maintenance or cleaning operation, turn off the device and disconnect the plug from the main supply.
- Only use the medication prescribed for you by your doctor and follow your doctor's instructions with regard to dosage, duration and frequency of the therapy.
- Depending on the pathology, only use the treatment that is recommended by your doctor.
- Only use the nose piece as expressly indicated by your doctor, paying special attention NEVER to introduce the bifurcations into the nose, but only positioning the device in the nostril.
- Check in the medicine instruction leaflet for possible contraindications for use with common aerosol therapy systems.
- Do not position the equipment so that it is difficult to operate the disconnection device.
- Only use the medication prescribed for you by your doctor and follow your doctor's instructions with regard to dosage, duration and frequency of the therapy.
- Depending on the pathology, only use the treatment that is recommended by your doctor.
- Do not use the nose piece as expressly indicated by your doctor, paying special attention NEVER to introduce the bifurcations into the nose, but only positioning the device in the nostril.
- Check in the medicine instruction leaflet for possible contraindications for use with common aerosol therapy systems.
- Do not position the equipment so that it is difficult to operate the disconnection device.

3. Preparation and Usage of this Device

- Connect the nebuliser with the air hose (6) to the compressor (1) and plug the power lead (2) into the socket (230V 50 Hz AC).
- Start to the treatment, set ON/OFF switch (3) into the «I» position.
 - The multpiece gives you a better drug delivery (4) (Liposolvent mugs).
 - Choose between adult (6) or child face mask (6) and make sure that it encloses the mouth and nose area completely.
 - Use all accessories including the nose piece (12) as prescribed by your doctor.
- During inhalation, sit upright and relaxed at a table and not in an armchair, in order to avoid worsening your respiratory ailments and impairing the treatment effectiveness. Do not lie down while inhaling. Stop inhalation if you feel unwell.
- After completing the inhalation period recommended by your doctor, switch the ON/OFF switch (3) to position «O» to turn off the device and unplug it from the socket. Empty the remaining medication from the nebuliser and clean the device as described in the section «Cleaning and Disinfecting».

This device was designed for intermittent use of 30 min. On 30 min. Off. Switch off the device after 30 min. use and wait for another 30 min. before you resume treatment.

The device requires no calibration.

No modification to the device is permitted.

4. Cleaning and Disinfecting

Thoroughly clean all components to remove medication residuals and possible impurities after each treatment. Use a soft and dry cloth with non-abrasive cleaners to clean the compressor.

Make sure that the internal parts of the device are not in contact with liquids and that the power plug is disconnected.

Cleaning and disinfecting of the accessories

Read the instructions for cleaning and disinfecting of the accessories as they are very important to the performance of the device and success of the therapy.

Before and after each treatment:

- Disassemble the nebuliser (3) by turning the lock counter-clockwise and remove the medicine conduction cone.
- Wash the components of the disassembled nebuliser, the mouthpiece (7) and the nose piece (12) by using tap water; dip in boiling water for 5 minutes. Reassemble the nebuliser components and connect it to the air hose connector, switch the device on and let it work for 10-15 minutes.
- Wash masks and air tube with warm water.
- Only use cold disinfecting liquids following the manufacturer's instructions.

Do not boil nor autoclave the air tube and masks.

5. Maintenance, Care, and Service

Order all spare parts from your dealer or pharmacist, or contact Microlife-Service (see forward).

Replacement of the nebuliser

Replace the nebuliser (3) after a long period of inactivity, in a case when it shows malfunctions, when the vapouriser head (3-a) is obstructed by dry medicine, dust, etc. We recommend to replace the nebuliser after a period between 6 months and 1 year depending on the use.

Only use original nebulisers!

Replacement of the air filter

In normal conditions of use, the air filter (13) must be replaced approximately after 500 working hours or after every 10-12 treatments and if the filter shows a grey or brown colour or is wet, replace it. Extract the filter and replace it with a new one.

This device should only be used with original accessories as shown in these instructions.

Do not use this device if you think it is damaged or notice anything unusual.

Never open this device.

This device comprises sensitive components and must be treated with caution. Observe the storage and operating conditions described in the Technical Specifications section.

Protect it from:

- water and moisture
- extreme temperatures
- impact and dropping
- contamination and dust
- heat and cold

Comply with the safety regulations concerning the electrical device and in particular:

- Never touch the device with wet or moist hands.
- Place the device on a stable and horizontal surface during its operation.
- Do not pull the power cord or the device itself to unplug it from the power socket.
- The power plug is a separate element from the grid power; keep the plug accessible when the device is in use.

Before plugging in the device, make sure that the electrical rating, shown on the rating plate on the bottom of the unit, corresponds to the mains rating. In case the power plug provided with the device does not fit your wall socket, contact qualified personnel for a replacement plug with that of a suitable one. In general, the use of adapters, simple or multiple, and/or extension cables is not recommended. If their use is indispensable, it is necessary to use types complying with safety regulations, while ensuring that they do not exceed the maximum power limits, indicated on adapters and extension cables.

Do not leave the unit plugged in when not in use, especially if the device will be used when it is not in operation.

The installation must be carried out according to the conditions of the manufacturer. An improper installation can cause damage to persons, animals or objects, for which the manufacturer cannot be held responsible.

Do not exceed the power load of this device. In case of a power load damage, contact a technical service center authorized by the manufacturer for its replacement.

The power supply cord should always be fully unwound in order to prevent dangerous overwinding. Before performing any maintenance or cleaning operation, turn off the device and disconnect the plug from the main supply.
