“From humble beginnings rooted in medical science, to a global digital innovator managing acute and chronic health challenges.”

Empower people for a healthy today and a better tomorrow.

From within a Taipei electronics research lab, engineer KY Lin was inspired by the digital revolution to turn the centuries-old analogue thermometer into one of the world's first digital fertility thermometers. The result was safer, more accurate and better performance. Today, Microlife is a global company. With a global business model, global partners, global customers and an international culture and mindset.

Our vision

We are a global company, driven to partner people for better health, wellness and peace of mind. Microlife is paving a path to digital health 2.0. We are supporting the industry in the shift to a new model of outcome-based health and medical services.

Our mission

We connect patient and healthcare professionals with intelligence and insights that measure key health indicators at all stages of life. We create, partner and manufacture the most industry-validated health monitoring devices with the deepest levels of market insight and expertise for a complete digital health monitoring solution.

Our products

We are one of the world leaders in the development and manufacturing of medical diagnostic equipment for home monitoring and institutional use. Blood pressure monitors, blood glucose monitoring system, digital thermometers and respiratory care devices are Microlife's core business.

Global regulatory compliance

Our products meet the protocols of leading gold-standard regulators:

- British and Irish Hypertension Society (BIHS)
- European Society of Hypertension (ESH)
- International Organization for Standardization (ISO)
- Association for the Advancement of Medical Instrumentation (AAMI)

reddot

Red Dot Design Award

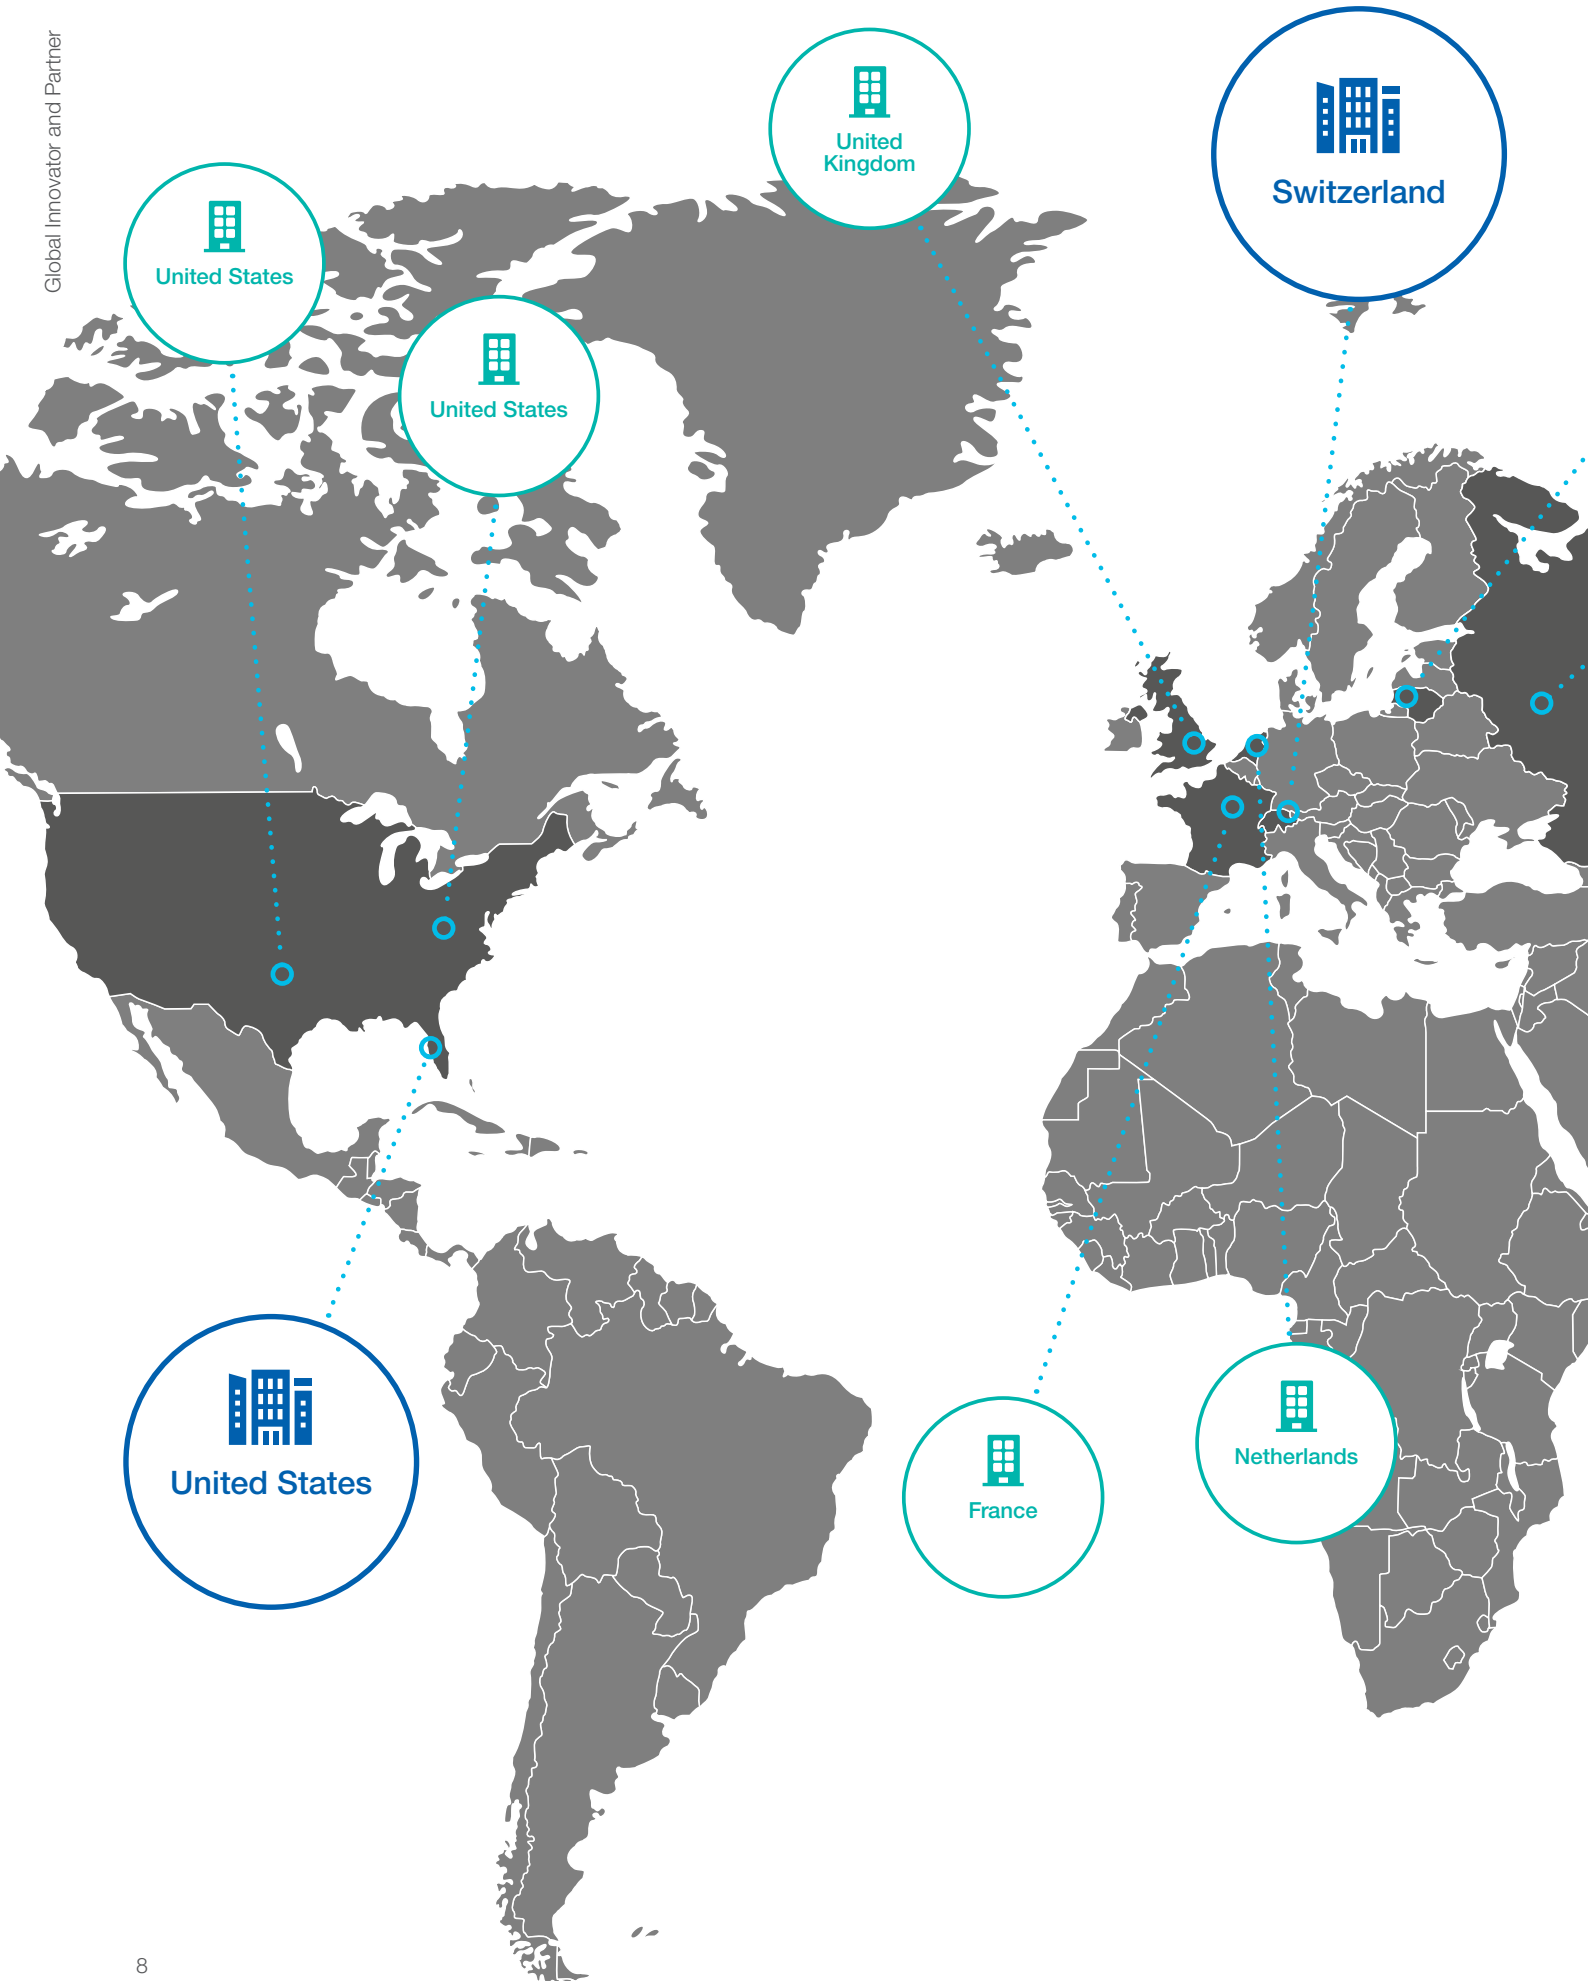

A part of our blood pressure monitors and digital thermometers have been recognised with one of the world's most reputable design award, the "red dot" product design.

Plastic-Free Packaging for Better Sustainability

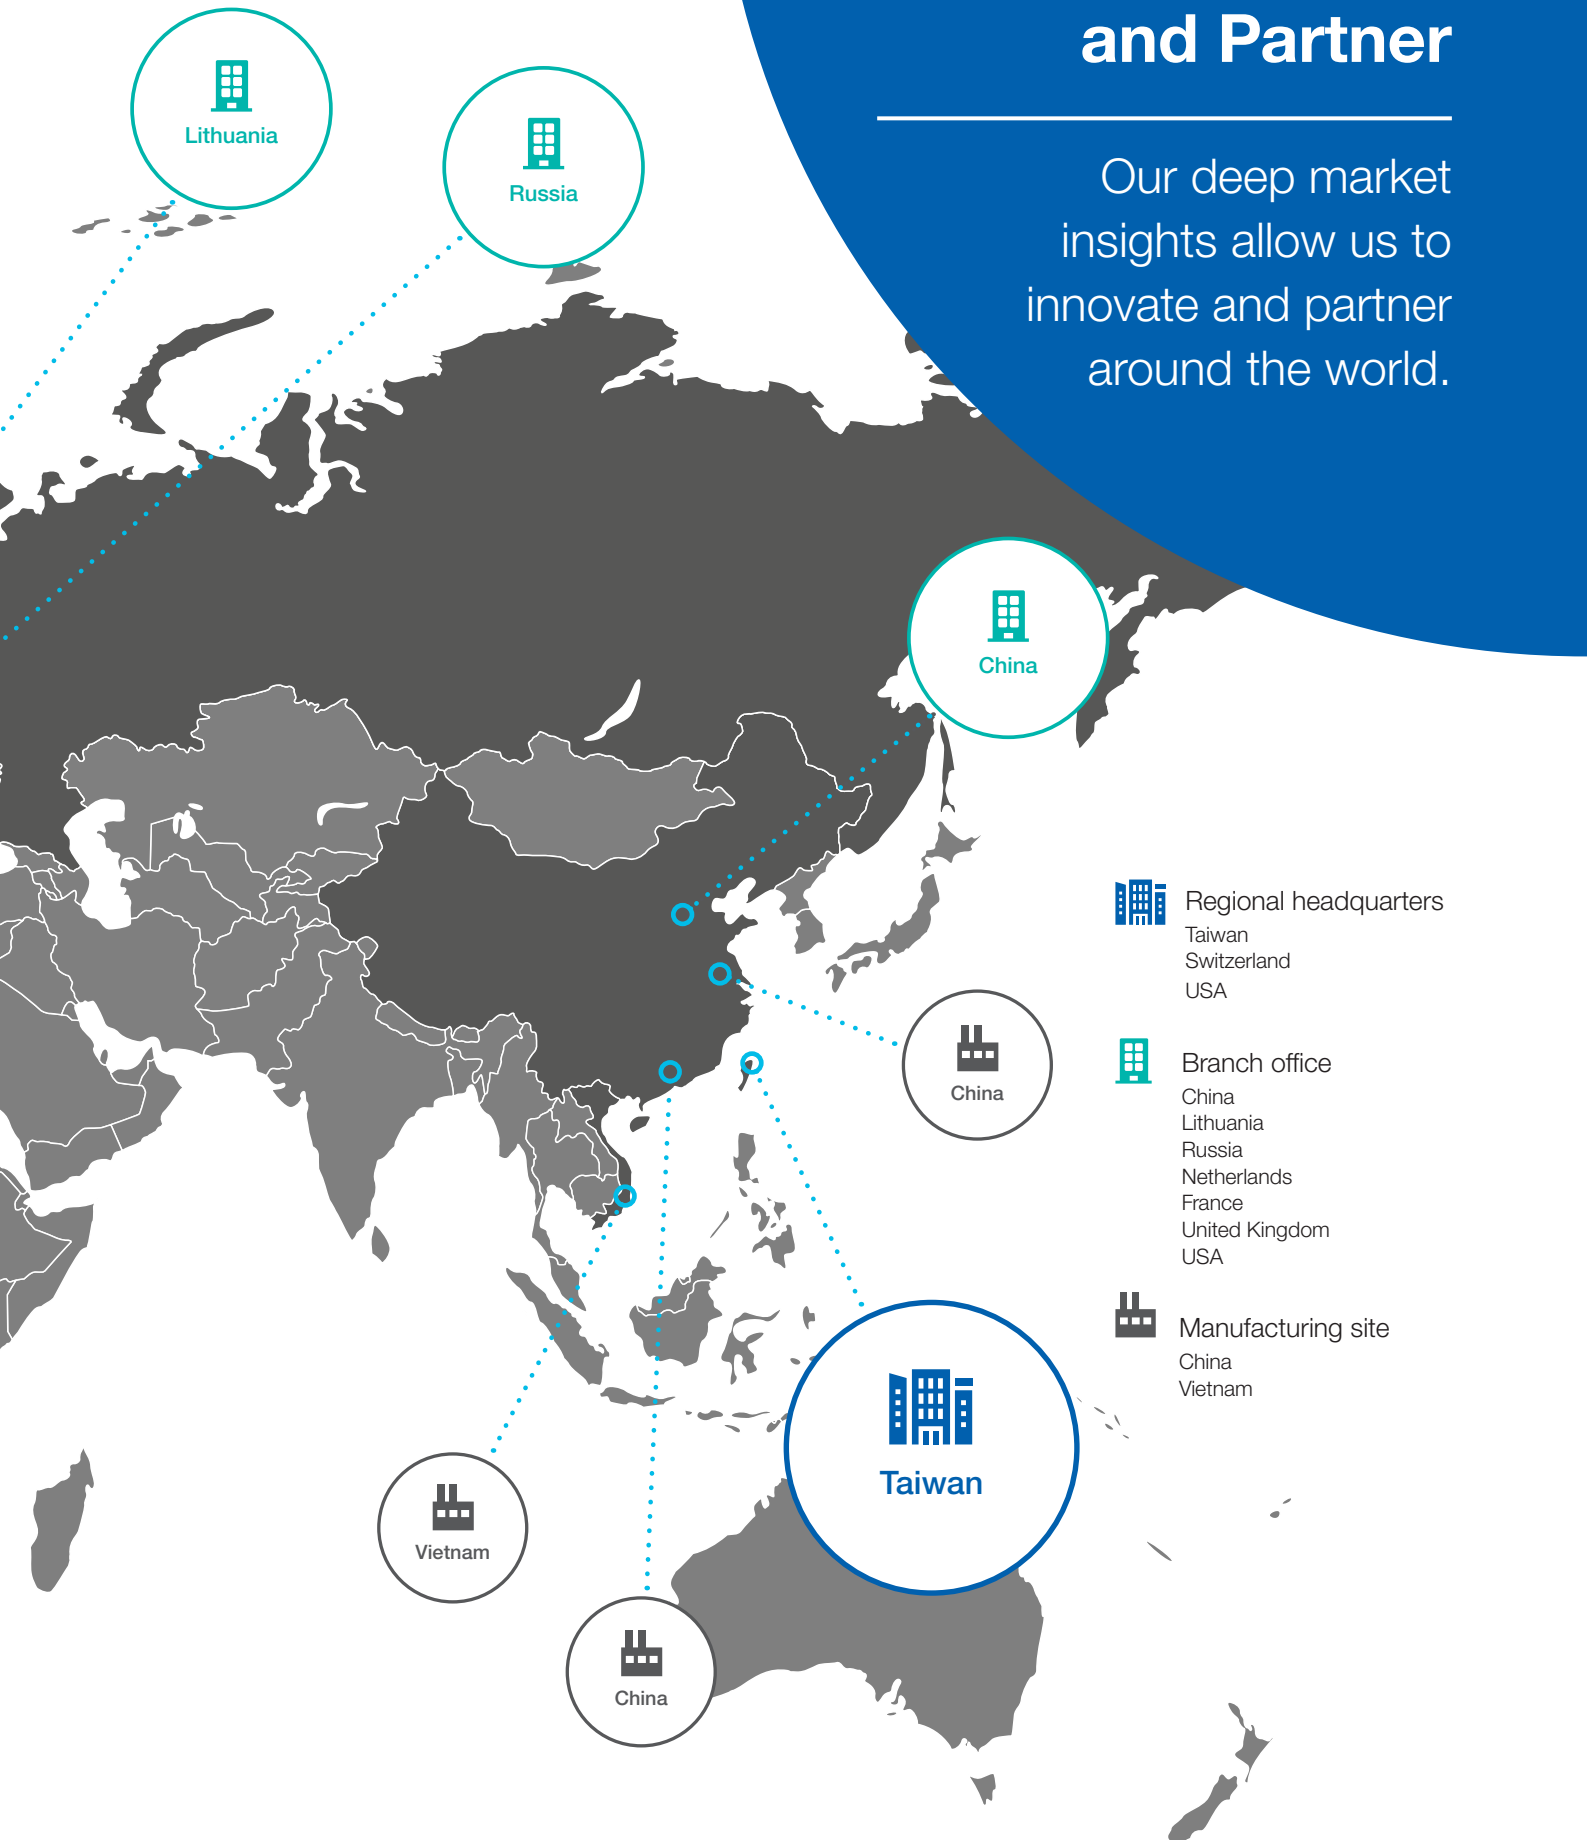

Microlife is saying goodbye to plastic by gradually phasing it out from our product packaging. Our commitment to a plastic-free approach reflects our dedication to a greener environment. Join us in protecting the planet and reducing plastic waste. Together, we'll create a sustainable future for generations to come. Choose Microlife's eco-friendly products with plastic-free packaging and be a part of the positive change. Together, we are nurturing a cleaner, healthier world for all.

“We create, partner and manufacture the most industry-validated health monitoring devices with the deepest levels of market insight and expertise for a complete digital health monitoring solution.”

Global Innovator and Partner

Our deep market insights allow us to innovate and partner around the world.

microlife[®]

Blood Pressure

Knowing your blood pressure and knowing if you have Atrial Fibrillation are the first steps in stroke prevention.

Blood pressure technologies

MAM technology

MAM (Microlife Average Mode) is the analysis of 3 successive blood pressure measurements in less than 3 minutes so that superior reliability is achieved by automatic weighted data. MAM technology provides highest accuracy for blood pressure monitoring both at home and in professional settings. Multiple readings give important information to doctors and ensures that treatment plans meet healthcare needs.

AFIBsens technology

Microlife blood pressure monitors with implemented AFIB technology, allow patients to be screened for Atrial Fibrillation during blood pressure measurements at home, using a sophisticated algorithm. If AF is detected during blood pressure measurements, the AFIB symbol is displayed.

IHB technology

The IHB (Irregular heartbeat) technology analyses pulse frequency and detects irregular heartbeat during blood pressure measurement. If an irregular heartbeat occurs during the measurement, the IHB symbol is displayed. IHB does not replace a cardiac examination, but it serves to detect pulse irregularities at an early stage.

Gentle+

The Gentle+ technology improves the inflation and deflation rate during blood pressure measurements. It is an adaptive pressure control technology, which allows optimal speed and pressure control thereby ensuring a comfortable measurement.

Comfort+

Comfort+ technology or also named IMT (Inflation Mode Technology), is a rather new measurement technique and allows an extra gentle, quick and accurate blood pressure measurement during inflation. This way the pressure on the upper arm is shorter in time and usually, the measurement duration is shorter.

Cuff Fit Check

Microlife Cuff Fit Check technology evaluates the signal during cuff inflation of a measurement, to determine if the cuff fit is sufficiently tight or not, and then displays corresponding symbols to indicate the cuff fit status. Please note that Cuff Fit status will be displayed only after the cuff is inflated to pressure above the user's diastolic pressure, because it takes time to check the pulse signal.

Microlife Connected Health+

Is a useful app for easily monitoring your blood pressure and other important health values like temperature or weight.

BP Analyzer+

This software helps you to get more comprehensive information regarding your blood pressure readings.

Clinical validation

Passed according to the ESH protocol and ISO81060-2:2013.

Clinical validation

Passed according to the BIHS protocol with A/A grade. Additionally, these monitors are validated for use in children from the age of 12 and special patient groups such as pregnancy and pre-eclampsia, renal disease, obesity and diabetes.

BP A7 TOUCH BT

Bluetooth® blood pressure monitor with stroke risk detection and touch screen

Stroke risk detection
High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)
3 measurements in 1 click and average result for superior reliability

App and PC software included
The Connected Health+ app and the BPA+ software enable you to easily analyse your blood pressure over a long-term

Features

- AFIBsens technology
- Bluetooth® connection
- USB cable and BPA+ software included
- Memory-average function
- Coloured traffic light for easy BP classification
- Lock function
- MAM technology
- Microlife Connected Health+ app included
- Optimal speed and pressure control with Gentle+
- 2 x 99 data memory with guest mode
- Adjustable time and date
- Optional use with rechargeable batteries
- Low battery indication
- Adapter included

www.microlife.com/a7-touch-bt

BP B6 Connect

Bluetooth® blood pressure monitor with stroke risk detection

Stroke risk detection

High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)

3 measurements in 1 click and average result for superior reliability

App and PC software included

The Connected Health+ app and the BPA+ software enable you to easily analyse your blood pressure over a long-term

Features

- AFIBsens technology
- IHB for detection of irregular heartbeat
- Optimal speed and pressure control with Gentle+
- LED traffic light indicator for blood pressure classification
- Extra large display
- Cuff fit check
- Arrow average indicator “MyCheck”
- 2 users with 99 data memory each
- Average of stored measurements of the last 28 days
- Clinical blood pressure average “MyBP”
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b6-connect

▶ Product video

BP B3 AFIB

Blood pressure monitor
with stroke risk detection

Stroke risk detection
High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)
3 measurements in 1 click and average result for superior reliability

Conical soft cuff M-L (22–42 cm)
Comfortable cuff with washable cuff cover for longlasting, hygienic use

Features

- Extra large display
- AFIBsens technology
- IHB for detection of irregular heartbeat
- Optimal speed and pressure control with Gentle+
- Cuff fit check
- Coloured traffic light for easy BP classification
- 99 data memory
- Average of stored measurements
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b3-afib

▶ Product video

BP B3 Comfort PC

Advanced blood pressure monitor with Comfort+ for an extra-smooth measurement during cuff inflation

3 MAM
Microlife Average Mode (MAM)
 3 measurements in 1 click and average result for superior reliability

Comfort+
 For a quick, accurate and extra comfortable measurement

PC connection and software
 PC connection with BP Analyzer+ software and USB cable included

Features

- Comfort+ technology
- USB cable and BPA+ software included
- MAM technology
- 2 users with 99 data memory each
- IHB for detection of irregular heartbeat
- Average of stored measurements
- Cuff fit check
- Coloured traffic light for easy BP classification
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b3-comfort-pc

BP B2 BASIC

Blood pressure monitor
with irregular heartbeat detection

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities

Gentle+
Optimal speed and pressure control for comfortable measurements

Conical soft cuff M-L (22–42 cm)
Comfortable cuff with washable cuff cover for longlasting, hygienic use

Features

- IHB technology
- Gentle+ technology
- Cuff fit check
- 30 data memory
- Average of stored measurements
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b2-basic

BP B1 CLASSIC

Blood pressure monitor with optimal speed and pressure control

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Gentle+
Optimal speed and pressure control for comfortable measurements

30 data memory and average display
Automatic storage of the last 30 blood pressure values and display of mean value of all stored readings

Features

- BP classification with single-colour eco traffic light
- Comfortable soft cuff for a wide range of arm sizes (22–42 cm)
- 30 data memory
- Adjustable date and time
- Cuff fit check
- Movement indicator

www.microlife.com/b1-classic

BP B4 BT

Bluetooth® blood pressure monitor with USB Type-C adapter socket

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities

Microlife Average Mode (MAM)
3 measurements in 1 click and average result for superior reliability

2 user Mode
2 users with 30 data memory per user

Features

- IHB technology
- Gentle+ technology
- 2 users with 30 memories each
- USB Type-C adapter socket
- 3 MAM technology
- Comfortable soft cuff for a wide range of arm sizes (22–42cm)
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Optional use with rechargeable battery

www.microlife.com/b4-bt

NEW

BP B1 STANDARD

Blood pressure monitor with USB Type-C adapter socket

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities

USB Type-C
USB Type-C socket for external power supply

30 data memory and average display
Automatic storage of the last 30 blood pressure values and display of mean value of all stored readings

Features

- IHB technology
- Gentle+ technology
- 30 memories
- USB Type-C adapter socket
- Comfortable soft cuff for a wide range of arm sizes (22–42cm)
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Optional use with rechargeable battery

www.microlife.com/b1-standard

BP W10 Basic

Wrist blood pressure monitor with irregular heartbeat detection

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Cuff Fit Check
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

30 data memory
Automatic storage of the last 30 readings

Features

- Cuff fit check
- BP classification with single-colour eco traffic light
- Pre-formed cuff (13.5–21.5 cm)
- 30 data memory
- Adjustable date and time
- Follow-up model for BP W1 Basic

www.microlife.com/w10-basic

BP W3 COMFORT

Wrist blood pressure monitor with Comfort+ inflation measurement

Clinically Validated
ISO protocol

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Comfort+
Extra gentle measurement during the inflation of the cuff

Extra-large wrist cuff
For wrist circumferences between 13.5cm up to 23cm

Features

- Silent measurement with Comfort+
- Irregular heartbeat (IHB) detection
- 30 data memory and average display
- Soft wrist cuff with D-ring (13.5–23 cm)
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Cuff fit check
- Optional use with rechargeable batteries

www.microlife.com/w3-comfort

BP N2 EASY

Semi-automatic blood pressure monitor with IHB technology

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

One button operation
Easy to use

Conical soft cuff M (22–32 cm)
Comfortable conical cuff

Features

- IHB technology
- 1 data memory
- Hypertension warning
- One-button operation
- Optional use with rechargeable batteries

www.microlife.com/n2-easy

Cuffs and supplies

Cuffs, as important as the blood pressure monitor

Rigid cuff

Conical, preshaped upper arm cuff for high level of comfort

Features

- Wide-range cuff size
- Conical, fan-shaped cuff for optimal fit
- Compatible with all Microlife blood pressure monitors (except BP B1 Classic and BP B1 Standard)
- Rigid material for easy self-attachment
- Clinically validated
- Available size:
M-L (22–42 cm/8.7–16.5")

www.microlife.com/rigid-cuff

Soft cuff

Conical, soft upper arm cuff with washable cuff cover

Features

- Washable cuff cover for long-term and hygienic use
- Conical, fan-shaped cuff for optimal fit
- Compatible with all Microlife blood pressure monitors (except BP B1 Classic and BP B1 Standard for S, L and L-XL cuff)
- Metal bar for easy self-attachment
- Clinically validated in all sizes
- Different sizes available:
S (17–22 cm/6.7–8.7"), M (22–32 cm/8.7–12.6")
M-L (22–42 cm/8.7–16.5"), L (32–42 cm/12.6–16.5"),
L-XL (32–52 cm/12.6–20.5")

BP AG1-40

Ergonomic and professional aneroid blood pressure kit

- ✓ **Precise deflation control**
Integrated dial and pumping ball provides good support during inflation and deflation
- ✓ **Professional cuff (25–40 cm)**
Soft wide-range cuff for professional fitting
- ✓ **Ergonomic operation**
Large scale dial for easy and professional reading

Features

- Manual aneroid blood pressure kit
- High-quality sphygmomanometer
- Stethoscope
- Professional cuff (without metal bar)
- Bulb and valve
- Soft bag

www.microlife.com/ag1-40

BP AG1-20

Cost-effective, basic aneroid blood pressure kit

- ✓ **Complete solution**
Stethoscope included in the kit
- ✓ **Easy to use**
Easy to read, inflate and deflate
- ✓ **Soft cuff M (22–32 cm)**
Soft cuff for normal fitting

Features

- Manual aneroid blood pressure kit
- High-quality sphygmomanometer
- Stethoscope
- Bulb and valve
- Soft bag

www.microlife.com/ag1-20

ST 77

Lightweight Sprague Rappaport stethoscope with turnable double-chestpiece

- ✓ High sound precision
- ✓ Reliable quality
- ✓ Accessories included

Features

- Stethoscope
- 3 spare ear tips of different sizes
- 3 bell type chest pieces
- 2 spare transparent plastic diaphragms
- Available in 5 colours:
black, dark blue, gray, red, lilac

www.microlife.com/st-77

ST 71

Single head light-weight stethoscope with flat chest piece

- ✓ High sound precision
- ✓ Reliable quality
- ✓ Lightweight chest piece

Features

- Stethoscope
- Lightweight aluminium chest piece
- Adjustable chrome-plated brass binaural
- Durable one-piece moulded PVC "Y" tubing
- Ear tips with soft cone-shaped bell

microlife[®]

Blood Glucose

High precision, less pain
and innovative technology
for monitoring blood
glucose easily.

2 blood glucose technologies you should know

AC/PC setting

AC (Ante Cibum) and **PC (Post Cibum)** meal markers provide more details on the test results of your blood glucose before and after meals. Testing your blood glucose both before and after meals, allows you to see how that meal affects your blood glucose levels and helps you to understand which meals may be best for your blood glucose control.

During the day, levels tend to be at their lowest just before meals. Recommended blood glucose value is 80–130 mg/dL for before meal. Then the peak value less than 180mg/dL 2 hours after eating.¹

The most powerful influence on blood glucose levels comes from food. Whether you have **type 1 or type 2 diabetes**, the peak blood glucose levels are often likely to occur around two hours after a meal. The advantage of testing in so called "pairs" of before and after meals, is that you can see how much your sugar levels have gone up (or even down) between meals.

"Wide HCT range" is the volume percentage of red blood cells in blood, also known as packed cell volume (PCV). The hematocrit is a known interference of blood glucose testing. Glucose meters are calibrated to provide accurate readings within a normal physiological range of values. Lower than normal HCT values result in overestimation of laboratory glucose levels when glucose strip methods are used, whereas HCT values higher than normal result in underestimates of laboratory values.²

Blood glucose monitoring system with hematocrit correction technology improves accuracy of blood glucose testing.

The technology used in the Microlife Gluco-A+ and Multiplex provides accurate blood glucose measurements over wider hematocrit range.

Determination of Hematocrit Interference in Blood Samples Derived from Patients with Different Blood Glucose Concentrations. *Journal of Diabetes Science and Technology*. <https://doi.org/10.1177/193229681300700122>

Multiplex

A comprehensive health monitor in your pocket for testing Glucose, Uric Acid, and Total Cholesterol levels.

Bluetooth® (optional)

3 in 1

3 in 1

Testing Glucose, Uric Acid, and Total Cholesterol levels

Wide HCT range

Hematocrit correction improving the accuracy for blood glucose test

Strip ejector

Prevent contamination from used test strip

Features

- 3 in 1 (Glucose, Uric Acid, Total Cholesterol)
- Sample type:
 - For glucose testing: capillary & venous whole blood
 - For uric acid and total cholesterol testing: capillary whole blood
- Strip ejection
- Micro-Volume blood sample
- Quick result: Glucose – 7 secs / Uric Acid – 15 secs / Total Cholesterol – 26 secs
- Bluetooth® connectivity (optional)
- 460 results storage (50 for Uric Acid, 50 for Total Cholesterol, 360 for Glucose)

NC 150 BT

Bluetooth® forehead thermometer for easy temperature monitoring

3
sec

3-seconds measurement

Fast and easy measurement without touching the person

Bluetooth® technology

Instant temperature monitoring on your smartphone

Silent Glow™ technology

Green: reading up to 37.4 °C
Red: reading higher than 37.4 °C

Features

- Infrared forehead thermometer
- Enables easy monitoring of the temperature by using Bluetooth® Smart
- Connects to the “Microlife Connected Health+” app (available free for iOS and Android)
- Blue tracking light – easy to use at night
- Multifunctional (body, object and ambient temperature)
- 30 data memory (stored with date and time)
- Sound control – silent mode option for measurements at night
- Clinically tested and recommended by doctors

www.microlife.com/nc-150-bt

NC 200

Non contact thermometer with auto- measurement and distance control

reddot award 2018 winner

3-seconds measurement
Touch-free measurement in only 3 seconds

Auto measurement with distance control
Takes a measurement automatically, when a distance within 5 cm is detected

Guidance system for self-measurement
The self-indicator light on the back shows the user that the device is at the right distance

Features

- Infrared forehead thermometer
- Precise, gentle and hygienic
- 30 data memory (stored with date and time)
- Multifunctional (body, object and ambient temperature)
- Blue tracking light – easy to use at night
- Illuminated fever alarm: Silent Glow™ technology
- Sound control – silent mode option for measurements at night
- Clinically tested in Europe

Respiratory Care

Inhale effectively
and breathe easy
with Microlife.

▶ Product video

NEB 310

Professional compressor
nebuliser 3 in 1

Efficient treatment

High performance system for the upper and medium/lower respiratory tract

3 in 1

3 nebulisation rates

Choose from 3 different nebulisation rates

Air flow technology

Adjustable flow rate for individual treatment

Features

- Powerful piston pump for continuous use
- Nasal washer for the treatment of upper airways
- Breath-enhanced nebuliser for lower airways
- Easy one button operation
- Suitable for all common inhalation solutions
- Hygienic and safe – accessories are washable and disinfectable
- Fully equipped with an extra soft adult and child face mask, mouthpiece with expiratory valve, nosepiece and spare filters

www.microlife.com/neb-310

▶ Product video

NEB 210

Compressor nebuliser with air flow technology

Efficient treatment

For the upper and lower respiratory tract

Fast treatment

High speed nebuliser for short inhalation times

Air flow technology

Adjustable flow rate for individual treatment

Features

- Innovative nebulisation system for efficient treatment
- Suitable for all common inhalation solutions
- Accessories are washable and disinfectable
- Easy storage and transportation with carrying bag
- Nebuliser holder – keep the nebuliser in its holder on the back of the device, so it will be handy for the next treatment
- Fully equipped with adult and child face mask, mouth- and nosepiece, spare filters and carrying bag

www.microlife.com/neb-210

NEB 150 MINI

Portable compressor nebuliser

Efficient treatment

For the upper and lower respiratory tract

One for all

Suitable for all common inhalation solutions

Small and lightweight

Portable design –
Ideal for travel

Features

- Micro-compressor technology
 - Suitable for all common inhalation solutions
 - Accessories are washable and disinfectable
 - Nebuliser holder – keep the nebuliser in its holder on the back of the device, so it will be handy for the next treatment
 - Fully equipped with adult and child face mask, mouth- and nosepiece, spare filters and carrying bag
- www.microlife.com/neb-150-mini

NEB NANO BASIC

Portable compressor nebuliser

Efficient nebulisation system

For the upper and lower respiratory tract

Portable design - Ideal for travel

Small, lightweight and ultra-silent - only 180g

One for all

Suitable for all common inhalation solutions

Features

- Patented micro-compressor technology
- Easy one button operation
- Accessories are washable and disinfectable
- Easy storage and transportation with carrying bag
- Nebuliser holder for easy use
- Equipped with adult and child face mask, mouthpiece, nosepiece, spare filters, power adapter (medical type) with micro-USB cable and carrying bag

NEB 400

NEB 410

NEB 400/410

Children's compressor nebuliser

Efficient treatment

For the upper and lower respiratory tract

High speed nebuliser

For short inhalation times

Child-friendly design

For a comfortable and silent operation

Features

- Fast and comfortable treatment for the whole family
- Suitable for all common inhalation solutions
- One button design – easy use
- Accessories are washable and disinfected
- Easy storage and transportation with carrying bag
- Nebuliser holder – keep the nebuliser in its holder on the back of the device, so it will be handy for the next treatment
- Fully equipped with adult and child face mask, mouth- and nosepiece, spare filters and carrying bag

microlife®

NEB 900

Rechargeable mesh nebuliser

Innovative nebulisation system
Stainless steel mesh

Ultra light and silent
Ideal for the entire family

Rechargeable by micro USB
Battery operated and easily rechargeable using USB cable

Features

- Vibrating mesh technology
- Two speed nebulisation levels
- Portable, pocket size design
- Low medicine residue
- Silent with low power consumption
- One button – user friendly interface
- Supplied with adult and child face masks, mouthpiece, carrying bag and micro USB cable

www.microlife.com/neb-900

PF 200 BT

Bluetooth® asthma monitor

High accuracy

Peak expiratory flow (PEF) & FEV₁ measurement

Traffic light system

For an immediate assessment of peak expiratory flow

Bluetooth®

Instant monitoring on your smartphone

Features

- High accuracy
- Rotating vane wheel method
- Washable flow sensor
- Easy to read LCD display
- 400 data memory stored with date and time
- Suitable for children and adults
- Asthma analyser software – useful for the management of the patient’s respiratory diary
- Supplied with software (free download from our website), connection cable and professional carrying bag

OXY 500 BT

Bluetooth® fingertip pulse oximeter

Medical grade accuracy

Determines oxygen saturation (SpO₂) and heart rate (pulse)

Gentle usage

Simple and completely pain-free measurement

Bluetooth® technology

Instant monitoring on your smartphone

Features

- Determines oxygen saturation (SpO₂) and heart rate (pulse)
- Bluetooth® technology for easy monitoring
- Instant monitoring on your smartphone with the Microlife Connected Health+ app
- Dual color OLED display
- Easy to read – Display with 6 available views
- Adjustable display brightness
- Risk reminder
- Low battery indication
- Automatic switch-off
- Supplied with carrying strap and pouch

Baby Care

Highest comfort with
Microlife breast pumps.

BC 100 Soft

Manual breast pump

Light, easy and ultra-quiet

Allows comfortable expressing of milk anywhere

BPA free

The bottle is completely free of BPA

Ideal for newborns

Milk bottle and silicone teat are specially designed for newborns

Features

- Vacuum technology simulates natural drinking for gentle and comfortable use
- Extra comfort with 2 expressing settings
- Hygienic and safe – accessories are washable and disinfectable
- Fully equipped with 180ml milk bottle (completely BPA free) with cap, bottle stand, two matching screw plugs for bottle and a naturally shaped
- Silicone teat for easy feeding
- Easy storage and transportation with carrying bag

www.microlife.com/bc100-soft

BC 200 Comfy

Electric Breast Pump

Individual usage

Highest comfort with 10 different stimulation settings

10 different pumping modes

Helps mothers to select the most comfortable pump setting for their milk flow

Easy to use

Large illuminated display with timer display easily tracks stimulation and expressing time

Features

- Designed to mimic baby's natural sucking rhythm with 2-phase vacuum technology
- Lightweight and compact design for easy expressing at home or on-the-go
- Memory function for personalised usage
- Battery and mains power operated (with battery level indicator)
- Equipped with 180ml milk bottle (completely BPA free) with cap, bottle stand, two matching screw plugs for bottle, naturally shaped silicone teat for easy feeding, medical power adapter and carrying bag

www.microlife.com/bc200-comfy

BC 300 Maxi 2 in 1

Dual electric breast pump

2 in 1 Innovative dual mode technology
Suitable for one and two-sided expressing

 **Gentle, convenient and time-saving**
Double expressing system for more milk in less time

 **Highly comfortable**
Memory function for personalised usage

Features

- Time-saving with dual mode vacuum technology
- Highest comfort with 10 different stimulation and expressing settings
- Large illuminated display with timer display which easily tracks stimulation and expressing time
- Battery and mains power operated (with battery level indicator)
- Equipped with 2 x 180ml milk bottles with caps, bottle stands, two matching screw plugs for bottle, naturally shaped silicone teat for easy feeding, medical power adapter and carrying bag

Weight

Our precise weight and diagnostic scales help you to find your healthy weight and keep it.

WS 500 BT

Bluetooth® diagnostic scale

Body composition diagnosis

Reliable measurement of your body composition

Automatic transfer via Bluetooth®

Allows fast analysis of your body composition with the Microlife Connected Health+ app

ITO coating

ITO (= Iindium Tin Oxide) electrode with safety glass weighing platform

Features

- Analysis of body weight, body fat percentage, body water ratio, basal metabolic rate, visceral fat level, muscle mass, protein, skeletal muscle, bone mass, BMI, body score, metabolic body age
- Large, easy to read display
- Automatic transfer via Bluetooth® technology
- Instant weight tracking on your smartphone with "Microlife Connected Health+" app (available free for iOS and Android)
- 180 kg capacity
- 100 g division

www.microlife.com/ws-500-bt

WS 300

Diagnostic scale

Multifunctional

Measures weight, body fat and body water

Instant on

Turn the scale on by tapping it firmly with your foot

Kg / lb selection

Choose between different weight units

Features

- Reliable measurement of your body composition (body weight, body fat, body water, muscle and bone mass, BMI, basal metabolic rate)
- Automatically calculates body fat and water percentage in function of height, age and sex
- Large, easy to read display
- 180kg capacity
- 100g division

www.microlife.com/ws-300

WS 150

Weight scale

Instant on

Turn the scale on by tapping it firmly with your foot

Automatic switch-off

Automatic switch-off after a few seconds after the measurement

Kg/lb selection

Choose between different weight units

Features

- Classic glass bathroom scale with a modern and clean appearance
- Accurate and easy to use
- Overload and low battery indicator
- Standing surface made of safety glass
- 180kg capacity
- 100g division

Data security. Transparent and clear.

Besides your health values, Microlife Connected Health+ also takes the security of your data into account. That's why you decide yourself if you want to use Microlife Connected Health+ locally only, without registration or cloud data storage. If you decide instead to store your data online as well, all relevant information regarding data protection can easily be found directly in the app or on our website – transparent and clear.

microlife[®]

Professional Products

Be part of the growing
movement to prevent
stroke and heart
disease.

WatchBP technologies

Atrial Fibrillation (AF) detection

AFIB reliably detects Atrial Fibrillation (AF) during blood pressure measurement

Non-invasive central blood pressure measurement

Non-invasive, reliable method based on brachial pulse volume plethysmography (PVP) waveforms

Ankle Brachial Index (ABI) assessment

For an easy, fast and accurate assessment of the Ankle Brachial (arm) Index

Night-time measurement

- For measuring blood pressure during sleep.
- Helps to collect accurate day and night blood pressure measurements for a good overview of the daily blood pressure pattern.

Double arm measurement

The most reliable tool for determining inter-arm blood pressure differences (IAD)

Auscultatory mode

For use in e.g. elderly, obese and those with arrhythmia.

WatchBP average mode

Three consecutive measurements in a row

Flexible BPM schedule

Enables the physicians to adjust the settings of time intervals and numbers of consecutive measurements to comply with different guidelines.

SPRINT algorithm

Performing automated office blood pressure measurements (AOBPM)

Customisable measurement functions

The device can be upgraded with additional helpful features such as Atrial Fibrillation (AF) detection, central BP measurement function, Ankle Brachial Index (ABI) assessment, or Pulse Wave Velocity (PWV) screening, depending on the model.

PC connection

User-friendly software included

ESH/AHA/BIHS guidelines embedded

The 7-days-measurement program

For recording medication intake

The pill-button can be used to record medication intake or to record an "event" that could influence blood pressure level.

Brachial-ankle pulse wave velocity (baPWV) assessment

User-friendly with high reproducible cuff-based baPWV measurement method to evaluate arterial stiffness. The result is strongly associated with reference carotid-femoral pulse wave velocity (cfPWV), risk factors for arterial stiffness and the presence of arterial damage.

WatchBP Office Vascular

Professional office blood pressure and cardiovascular screening monitor

Bluetooth®

Brachial-ankle PWV assessment*

For an easy, fast, and accurate assessment of the Ankle Brachial (arm) Index

Non-invasive central blood pressure measurement*

Determines blood pressure of the ascending aorta based on the PVP waveforms to help in making a reliable diagnosis of cardiovascular risk and hypertension

Upgradeable measurement functions

Allows on-demand paid upgrades of "ABI Version" or "PWV Version" (ABI, baPWV and central BP included)

Features

- Fast, easy and accurate Ankle Brachial Index (ABI) assessment*
- User-friendly software included
- Dual-cuff design for simultaneous measurement on both arms to assess the Inter-Arm-Difference (IAD).
- Automated office blood pressure measurement (AOBPM) with implemented SPRINT algorithm
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

WatchBP Office 2G

Professional automated office blood pressure monitor

Bluetooth®

Atrial Fibrillation (AF) detection*

AFIBsens detects AF with high accuracy (sensitivity 98 %, specificity 92 %) as demonstrated in multiple comparative studies with a 12-lead ECG

Non-invasive central blood pressure measurement*

Determines blood pressure of the ascending aorta based on the PVP waveforms to help in making a reliable diagnosis of cardiovascular risk and hypertension

Upgradeable measurement functions

Allows on-demand paid upgrades of “AFIB version” or “CBP” version (AFIB and Central BP included)

Features

- Display of Mean Arterial Pressure (MAP) and Pulse Pressure (PP)
- User-friendly software included
- Easy data transfer via Bluetooth® or USB cable
- Automated office blood pressure measurement (AOBPM) with implemented SPRINT algorithm
- Rechargeable battery pack
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

O3 Ambulatory 2G

Professional 24-hour
blood pressure monitor

Bluetooth®

Ambulatory blood pressure measurement

User-friendly ambulatory blood pressure monitor for 24-hours blood pressure measurements

Customisable measurement functions

Customise your ABPM according to your needs with features such as central measurement function or Atrial Fibrillation detection

Atrial Fibrillation (AF) detection*

AFIB detects AF with high accuracy (sensitivity 98 %, specificity 92 %)

Features

- PC connectivity with Bluetooth® and USB
- User friendly software for easy data analysis included
- 330 data memory for pill intake, event and blood pressure measurement recordings
- Sophisticated design to fulfil hygiene standards
- Fully-programmable
- Non-invasive central blood pressure measurement*
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

*optional features

Cuffs and supplies

Cuffs, as important as the blood pressure monitor

WatchBP

Office cuff

Soft upper arm cuff, applicable for all WatchBP Office devices

Properties

- To fulfil hygienic needs in the professional setting the cuffs are washable in washing machine after removing the bladder
- All cuff bladders are both latex and PVC free
- Available in nylon and cotton
- Available sizes: S (14–22 cm), M (22–32 cm), L (32–42 cm), L–XL (32–52 cm)

www.microlife.com/watchbpaccessories

WatchBP

Office ankle cuff

Conical, soft ankle cuff, applicable for WatchBP Office ABI and Vascular

Properties

- Ankle cuff for measuring the Ankle Brachial (arm) Index (ABI) and brachial-ankle pulse wave velocity (baPWV)
- All cuff bladders are both latex and PVC free
- 170 cm tube with cuff connector
- The conical shape provides a better fit on special group patients
- Available sizes: M (22–32 cm) and L (32–42 cm)

www.microlife.com/watchbpaccessories

“Using the wrong size cuff is a major cause for erroneous blood pressure measurement.”

WatchBP

Ambulatory cuff

Soft upper arm ambulatory cuff, applicable for all WatchBP O3 devices

Properties

- To fulfil hygienic needs in the professional setting the cuffs are washable in washing machine after removing the bladder
- All cuff bladders are both latex and PVC free
- Available in nylon and cotton
- Available sizes: S (14–22 cm), M (22–32 cm), L (32–42 cm), L–XL (32–52 cm)

www.microlife.com/watchbpaccessories

WatchBP

Home cuff

Soft upper arm cuff, applicable for all WatchBP Home devices

Properties

- With metal bar for easy self-attachment
- All cuff bladders are both latex and PVC free
- Available sizes: S (17–22 cm), M (22–32 cm), L (32–42 cm), L–XL (32–52 cm)

www.microlife.com/watchbpaccessories

WatchBP Analyzer Software

Compatible models:

WatchBP Office 2G; WatchBP Office Vascular; WatchBP Office ABI, WatchBP Office AFIB; all WatchBP O3 variants; WatchBP Home; WatchBP Home A; WatchBP Home A BT

WatchBP O3
