“Our vision is to empower people through our products and services to be able to manage and promote their own health.”

A partner for people. For life.

Microlife is one of the world leaders in the development and manufacturing of medical diagnostic equipment for home monitoring and institutional use. Blood pressure monitors, blood glucose monitoring system, digital thermometers and respiratory care devices are Microlife's core business.

Empowering people

Microlife is the world's leading manufacturer of thermometers. The company is also one of the world market leaders in the development and production of medical diagnostic equipment – for use at home and in health facilities. Blood pressure monitors, digital thermometers, respiratory care devices and flexible heat pads are some of our core products.

Our guiding principle

As the pioneer of the mercury-free digital thermometer, Microlife products are free of environmentally hazardous substances. We strive for high quality, reliability and accuracy. We develop technology for the benefit of your health and set the quality standard just as high as for professional applications.

Our products

Our medical devices are approved for hospital use and guarantee the highest level of safety. They are robust and user-friendly. Whether it's fever, blood pressure, respiratory care, weight management or flexible heating, our technology offers precise and reliable solutions.

Our focus: Home diagnostics

We supply everything you need to analyse your condition at home. People want to take responsibility for themselves. We support you in this. This is our future.

reddot

Red Dot Design Award

A part of our blood pressure monitors and digital thermometers have been recognised with one of the world's most reputable design award, the "red dot" product design.

Plastic-Free Packaging for Better Sustainability

Microlife is saying goodbye to plastic by gradually phasing it out from our product packaging. Our commitment to a plastic-free approach reflects our dedication to a greener environment. Join us in protecting the planet and reducing plastic waste. Together, we'll create a sustainable future for generations to come. Choose Microlife's eco-friendly products with plastic-free packaging and be a part of the positive change. Together, we are nurturing a cleaner, healthier world for all.

“In the future, we want to continue working together to do what we do best: Providing strong solutions for people. For life.”

A partner for people. For life.

Blood Pressure

Knowing your blood pressure and knowing if you have Atrial Fibrillation are the first steps in stroke prevention.

Blood pressure technologies

MAM technology

MAM (Microlife Average Mode) is the analysis of 3 successive blood pressure measurements in less than 3 minutes so that superior reliability is achieved by automatic weight data. MAM technology provides highest accuracy for blood pressure monitoring both at home and in professional settings. Multiple readings give important information to doctors and ensures that treatment plans meet healthcare needs.

AFIBsens technology

Microlife blood pressure monitors with implemented AFIB technology, allow patients to be screened for Atrial Fibrillation during blood pressure measurements at home, using a sophisticated algorithm. If AF is detected during blood pressure measurements, the AFIB symbol is displayed.

IHB technology

The IHB (Irregular heartbeat) technology analyses pulse frequency and detects irregular heartbeat during blood pressure measurement. If an irregular heartbeat occurs during the measurement, the IHB symbol is displayed. IHB does not replace a cardiac examination, but it serves to detect pulse irregularities at an early stage.

Gentle+

The Gentle+ technology improves the inflation and deflation rate during blood pressure measurements. It is an adaptive pressure control technology, which allows optimal speed and pressure control thereby ensuring a comfortable measurement.

Comfort+

Comfort+ technology or also named IMT (Inflation Mode Technology), is a rather new measurement technique and allows an extra gentle, quick and accurate blood pressure measurement already during inflation. Thereby the patient suffers less long from the unpleasant pressure on the upper arm and usually, the measurement duration is shorter.

Cuff Fit Check

Microlife Cuff Fit Check technology evaluates the signal during cuff inflation of a measurement, to determine if the cuff fit is sufficiently tight or not, and then displays corresponding symbols to indicate the cuff fit status. Please note that Cuff Fit status will be displayed only after the cuff is inflated to pressure above the user's diastolic pressure, because it takes time to check the pulse signal.

Microlife Connected Health+

is a useful app for easily monitoring your blood pressure and other important health values like temperature or weight.

BP Analyzer+

This software helps you to get more comprehensive information regarding your blood pressure readings.

Clinical validation

passed according to the ESH protocol and ISO81060-2:2013.

Clinical validation

passed according to the BIHS protocol with A/A grade. Additionally, these monitors are validated for use in children from the age of 12 and special patient groups such as pregnancy and pre-eclampsia, renal disease, obesity and diabetes.

BP A7 TOUCH BT

Bluetooth® blood pressure monitor with stroke risk detection and touch screen

Stroke risk detection
High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)
3 measurements in 1 click and average result for superior reliability

App and PC software included
The Connected Health+ app and the BPA+ software enable you to easily analyse your blood pressure over a long-term

Features

- AFIBsens technology
- Bluetooth® connection
- USB cable and BPA+ software included
- Memory-average function
- Coloured traffic light for easy BP classification
- Lock function
- MAM technology
- Microlife Connected Health+ app included
- Optimal speed and pressure control with Gentle+
- 2 x 99 data memory with guest mode
- Adjustable time and date
- Optional use with rechargeable batteries
- Low battery indication
- Adapter included

www.microlife.com/a7-touch-bt

BP B6 Connect

Bluetooth® blood pressure monitor with stroke risk detection

Stroke risk detection

High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)

3 measurements in 1 click and average result for superior reliability

App and PC software included

The Connected Health+ app and the BPA+ software enable you to easily analyse your blood pressure over a long-term

Features

- AFIBsens technology
- IHB for detection of irregular heartbeat
- Optimal speed and pressure control with Gentle+
- LED traffic light indicator for blood pressure classification
- Extra large display
- Cuff fit check
- Arrow average indicator "MyCheck"
- 2 users with 99 data memory each
- Average of stored measurements of the last 28 days
- Clinical blood pressure average "MyBP"
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b6-connect

BP A6 BT

Bluetooth® blood pressure monitor with stroke risk detection

Stroke risk detection
High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)
3 measurements in 1 click and average result for superior reliability

App and PC software included
The Connected Health+ app and the BPA+ software enable you to easily analyse your blood pressure over a long-term

Features

- AFIBsens technology
- MAM technology
- Bluetooth®
- Microlife Connected Health+ app
- USB cable and BPA+ software included
- Optimal speed and pressure control with Gentle+
- 99 data memory
- Memory-average function
- Coloured traffic light for easy BP classification
- Lock function
- Adjustable date and time
- Low battery indication
- Adapter included
- Optional use with rechargeable batteries

BP B3 AFIB

Clinically Validated
BHS protocol: A/A

Blood pressure monitor
with stroke risk detection

Stroke risk detection

High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

Microlife Average Mode (MAM)

3 measurements in 1 click and average result for superior reliability

Conical soft cuff M-L (22–42 cm)

Comfortable cuff with washable cuff cover for longlasting, hygienic use

Features

- Extra large display
- AFIBsens technology
- IHB for detection of irregular heartbeat
- Optimal speed and pressure control with Gentle+
- Cuff fit check
- Coloured traffic light for easy BP classification
- 99 data memory
- Average of stored measurements
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b3-afib

▶ Product video

BP B3 Comfort PC

Advanced blood pressure monitor with Comfort+ for an extra-smooth measurement during cuff inflation

3
MAM

Microlife Average Mode (MAM)

3 measurements in 1 click and average result for superior reliability

Comfort+

Comfort+

For a quick, accurate and extra comfortable measurement

PC connection and software

PC connection with BP Analyzer+ software and USB cable included

Features

- Comfort+ technology
- USB cable and BPA+ software included
- MAM technology
- 2 users with 99 data memory each
- IHB for detection of irregular heartbeat
- Average of stored measurements
- Cuff fit check
- Coloured traffic light for easy BP classification
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

BP B2 BASIC

Blood pressure monitor with irregular heartbeat detection

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities

Gentle+
Optimal speed and pressure control for comfortable measurements

Conical soft cuff M-L (22–42 cm)
Comfortable cuff with washable cuff cover for lasting, hygienic use

Features

- IHB technology
- Gentle+ technology
- Cuff fit check
- 30 data memory
- Average of stored measurements
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Low battery indicator
- Optional use with rechargeable batteries

www.microlife.com/b2-basic

BP B1 CLASSIC

Blood pressure monitor with optimal speed and pressure control

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Gentle+
Optimal speed and pressure control for comfortable measurements

30 data memory and average display
Automatic storage of the last 30 blood pressure values and display of mean value of all stored readings

Features

- BP classification with single-colour eco traffic light
- Comfortable soft cuff for a wide range of arm sizes (22 – 42 cm)
- 30 data memory
- Adjustable date and time
- Cuff fit check
- Movement indicator

www.microlife.com/b1-classic

BP W10 Basic

Wrist blood pressure monitor with irregular heartbeat detection

Clinically Validated
BHS protocol: A/A

Detection of irregular heartbeat

Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Cuff Fit Check

Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

30 data memory

Automatic storage of the last 30 readings

Features

- Cuff fit check
- BP classification with single-colour eco traffic light
- Pre-formed cuff (13,5 – 21,5 cm)
- 30 data memory
- Adjustable date and time
- Follow-up model for BP W1 Basic

www.microlife.com/w10-basic

BP W70 BT

Wrist blood pressure monitor with Comfort+ inflation measurement

Bluetooth®

Detection of irregular heartbeat
Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Comfort+
Extra gentle measurement during the inflation of the cuff

99 data memory
Automatic storage of the last 99 readings

Features

- Silent measurement with Comfort+
 - Wrist position check
 - Bluetooth® connection
 - 2 Users with 99 data memory each
 - Adjustable date and time
- www.microlife.com/w70-bt

BP w3 COMFORT

Wrist blood pressure monitor with Comfort+ inflation measurement

Detection of irregular heartbeat

Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

Comfort+

Extra gentle measurement during the inflation of the cuff

Extra-large wrist cuff

For wrist circumferences between 13.5cm up to 23cm

Features

- Silent measurement with Comfort+
- Irregular heartbeat (IHB) detection
- 30 data memory and average display
- Soft wrist cuff with D-ring (13.5-23cm)
- BP classification with single-colour eco traffic light
- Adjustable date and time
- Cuff fit check
- Optional use with rechargeable batteries

www.microlife.com/w3-comfort

BP N2 EASY

Semi-automatic blood pressure monitor with IHB technology

Detection of irregular heartbeat

Irregular heartbeat (IHB) detection for early alerts to possible heart irregularities.

One button operation

Easy to use

Conical soft cuff M (22–32 cm)

Comfortable conical cuff

Features

- IHB technology
- 1 data memory
- Hypertension warning
- One-button operation
- Optional use with rechargeable batteries

www.microlife.com/n2-easy

Cuffs and supplies

Cuffs, as important as the blood pressure monitor

Rigid cuff

Conical, preshaped upper arm cuff for high level of comfort

Features

- Wide-range cuff size
- Conical, fan-shaped cuff for optimal fit
- Compatible with all Microlife blood pressure monitors (except BP B1 Classic)
- Rigid material for easy self-attachment
- Clinically validated
- Available size:
M-L (22–42 cm/8.7–16.5")

www.microlife.com/rigid-cuff

Soft cuff

Conical, soft upper arm cuff with washable cuff cover

Features

- Washable cuff cover for long-term and hygienic use
- Conical, fan-shaped cuff for optimal fit
- Compatible with all Microlife blood pressure monitors (except BP B1 Classic)
- Metal bar for easy self-attachment
- Clinically validated in all sizes
- Different sizes available:
S (17–22 cm/6.7–8.7")
M (22–32 cm/8.7–12.6")
M-L (22–42 cm/8.7–16.5")
L (32–42 cm/12.6–16.5")
L-XL (32–52 cm/12.6–20.5")

BP AG1-40

Ergonomic and professional aneroid blood pressure kit

Precise deflation control

Integrated dial and pumping ball provides good support during inflation and deflation

Professional cuff (25–40 cm)

Soft wide-range cuff for professional fitting

Ergonomic operation

Large scale dial for easy and professional reading

Features

- Manual aneroid blood pressure kit
- High-quality sphygmomanometer
- Stethoscope
- Professional cuff (without metal bar)
- Bulb and valve
- Soft bag

www.microlife.com/ag1-40

BP AG1-20

Cost-effective, basic aneroid blood pressure kit

Complete solution

Stethoscope included in the kit

Easy to use

Easy to read, inflate and deflate

Soft cuff M (22–32 cm)

Soft cuff for normal fitting

Features

- Manual aneroid blood pressure kit
- High-quality sphygmomanometer
- Stethoscope
- Bulb and valve
- Soft bag

ST 77

Lightweight Sprague
Rappaport stethoscope with
turnable double-chestpiece

High sound precision

Reliable quality

Accessories included

Features

- Stethoscope
- 3 spare ear tips of different sizes
- 3 bell type chest pieces
- 2 spare transparent plastic diaphragms
- Available in 5 colours:
black, dark blue, gray, red, lilac

www.microlife.com/st-77

ST 71

Single head light-weight stethoscope with flat chest piece

- ✓ High sound precision
- ✓ Reliable quality
- ✓ Lightweight chest piece

Features

- Stethoscope
- Lightweight aluminium chest piece
- Adjustable chrome-plated brass binaural
- Durable one-piece moulded PVC “Y” tubing
- Ear tips with soft cone-shaped bell

www.microlife.com/st-71

microlife[®]

A partner for people. For life.

A person wearing a green sweater and a brown knit hat is sitting at a wooden table, looking out a window. The background features a rustic kitchen with a brick wall, a white kettle, and three mugs hanging on a rack. A large orange semi-circle is overlaid on the right side of the image.

Blood Glucose

High precision, less pain
and innovative technology
for monitoring blood
glucose easily.

2 blood glucose technologies you should know

AC/PC setting

AC (Ante Cibum) and **PC (Post Cibum)** meal markers provide more details on the test results of your blood glucose before and after meals. Testing your blood glucose both before and after meals, allows you to see how that meal affects your blood glucose levels and helps you to understand which meals may be best for your blood glucose control.

During the day, levels tend to be at their lowest just before meals. Recommended blood glucose value is 80–130 mg/dL for before meal. And the peak value less than 180mg/dL 2 hours after eating.¹

The most powerful influence on blood glucose levels comes from food. Whether you have **type 1 or type 2 diabetes**, the peak blood glucose levels are often likely to occur around two hours after a meal. The advantage of testing in so called "pairs" of before and after meals, is that you can see how much your sugar levels have gone up (or even down) between meals.

"Wide HCT range" is the volume percentage of red blood cells in blood, also known as packed cell volume (PCV). The hematocrit is a known interference of blood glucose testing. Glucose meters are calibrated to provide accurate readings within a normal physiological range of values. Lower than normal HCT values result in overestimation of laboratory glucose levels when glucose strip methods are used, whereas HCT values higher than normal result in underestimates of laboratory values.²

Blood glucose monitoring system with hematocrit correction technology improves accuracy of blood glucose testing.

The technology used in the Microlife Gluco-A+ and Multiplex provides accurate blood glucose measurements over wider hematocrit range.

² Pfützner, A., Schipper, C., Ramljak, S., Flacke, F., Sieber, J., Forst, T., & Musholt, P. B. (2013). Determination of Hematocrit Interference in Blood Samples Derived from Patients with Different Blood Glucose Concentrations. *Journal of Diabetes Science and Technology*. <https://doi.org/10.1177/193229681300700122>

Gluco-A+

Blood glucose monitoring system with gold electrode

Wide HCT range

Hematocrit correction improving the accuracy for blood glucose test

7
sec

7 seconds testing time

AC/PC Settings

Before/After meal measurement setting

Features

- Sample type: capillary whole blood testing
- Wide HCT range
- Gold electrode
- GDH-FAD reagent
- 1 μ L blood sample
- Measurement in 7 seconds
- No coding required
- AC/PC mark
- 4 Alarm settings
- Instant testing after strip inserted
- Instant 7, 14, 30, 90 days average
- 1000 results storage

www.microlife.com/gluco-a

Gluco-A⁺ Test Strips

For Microlife Gluco-A⁺

GDH-FAD reagent

1 µL blood sample

Features

- Gold electrode
- GDH-FAD reagent
- 1.0 µL blood sample
- Available with 25, 50, 100 pcs in vial/box

GlucoTeq

Blood glucose monitoring system with user friendly design. Easily track your blood sugar levels in daily life.

5
sec

Fast measurement
Measurement in 5 seconds

AC/PC Settings
Before/After meal measurement mark

Features

- Sample type: capillary whole blood
- Strip insert illuminated guidance
- GDH-FAD reagent
- 0.5µL blood sample
- Measurement in 5 seconds
- No coding required
- AC/PC mark
- 4 Alarm settings
- Instant testing after strip inserted
- Instant 7, 14, 28, 60, 90 days average
- 500 results storage

www.microlife.com/glucoTEQ

GlucoTeq Test Strips

For Microlife GlucoTeq

GDH-FAD reagent

0.5 µL blood sample

Features

- GDH-FAD reagent
- 0.5 µL blood sample
- Available with 25, 50, and 100 pcs in vial/box

www.microlife.com/glucoTEQ-accessories

DiaRite

Blood glucose monitoring system with extra large size LCD screen. To prevent contamination the used strip can easily be removed by the strip ejector.

5
sec

Fast measurement

Measurement in 5 seconds

Strip ejector

Prevent contamination from used test strip

AC/PC Settings

Before/After meal measurement mark

Features

- Sample type: capillary whole blood and venous whole blood
- Large display
- Strip ejection
- GDH-FAD reagent
- 0.5µL blood sample
- Measurement in 5 seconds
- No coding required
- AC/PC (before/after)
- 4 Alarm settings
- Instant testing after strip inserted
- Instant 7, 14, 30, 90 days average
- 450 results storage

www.microlife.com/diarite

DiaRite Test Strips

For Microlife DiaRite

GDH-FAD reagent

0.5 µL blood sample

Features

- GDH-FAD reagent
- 0.5 µL blood sample
- Available with 25, 50, and 100 pcs in vial/box

www.microlife.com/diarite-accessories

Multiplex

A comprehensive health monitor in your pocket for testing Glucose, Uric Acid, and Total Cholesterol levels.

Bluetooth® (optional)

3 in 1

3 in 1

Testing Glucose, Uric Acid, and Total Cholesterol levels

Wide HCT range

Hematocrit correction improving the accuracy for blood glucose test

Strip ejector

Prevent contamination from used test strip

Features

- 3 in 1 (Glucose, Uric Acid, Total Cholesterol)
- Sample type:
 - For glucose testing: capillary & venous whole blood
 - For uric acid and total cholesterol testing: capillary whole blood
- Strip ejection
- Micro-Volume blood sample
- Quick result: Glucose – 7 secs / Uric Acid – 15 secs / Total Cholesterol – 26 secs
- Bluetooth® connectivity (optional)
- 460 results storage (50 for Uric Acid, 50 for Total Cholesterol, 360 for Glucose)

www.microlife.com/multiplex

Multiplex Test Strips

GDH GDH-FAD reagent
 7 sec 7 seconds testing time
 0.7µL 0.7 µL blood sample

Glucose Test Strip Features

- HCT Range: 0~70%
- Reagent: GDH-FAD
- Available with 25, 50, 100 pcs in vial/box

1.0µL 1.0 µL blood sample
 15 sec 15 seconds testing time

Uric Acid Test Strip Features

- HCT Range: 20~70%
- Reagent: Cellulose
- Available with 10, 25 pcs in vial or foil /box

0.8µL 0.8 µL blood sample
 26 sec 26 seconds testing time

Total Cholesterol Test Strip Features

- HCT Range: 30~70%
- Reagent: Total Cholesterol esterase & oxidase
- Available with 10, 25 pcs in vial or foil /box

Fever

High precision,
quality and innovative
technologies for
fever management.

NC 150 BT

Bluetooth® forehead thermometer for easy temperature monitoring

3
sec

3-seconds measurement
Fast and easy measurement without touching the person

Bluetooth® technology
Instant temperature monitoring on your smartphone

36.2°C
37.6°C

Silent Glow™ technology
Green: reading up to 37.4°C
Red: reading higher than 37.4°C

Features

- Infrared forehead thermometer
- Enables easy monitoring of the temperature by using Bluetooth® Smart
- Connects to the “Microlife Connected Health+” app (available free for iOS and Android)
- Blue tracking light – easy to use at night
- Multifunctional (body, object and ambient temperature)
- 30 data memory (stored with date and time)
- Sound control – silent mode option for measurements at night
- Clinically tested and recommended by doctors

www.microlife.com/nc-150-bt

NC 200

Non contact thermometer with auto-measurement and distance control

reddot award 2018 winner

3-seconds measurement

Touch-free measurement in only 3 seconds

Auto measurement with distance control

Takes a measurement automatically, when a distance within 5 cm is detected

Guidance system for self-measurement

The self-indicator light on the back shows the user that the device is at the right distance

Features

- Infrared forehead thermometer
- Precise, gentle and hygienic
- 30 data memory (stored with date and time)
- Multifunctional (body, object and ambient temperature)
- Blue tracking light – easy to use at night
- Illuminated fever alarm: Silent Glow™ technology
- Sound control – silent mode option for measurements at night
- Clinically tested in Europe
- Red Dot Award: Product Design 2018

NC 300

Non contact thermometer
with an easy to use ergonomic design

3
sec

3-seconds measurement

Fast and easy measurement
without touching the person

Blue tracking light

A blue LED light indicates the correct
measurement area and the distance

Silent Glow™ technology

Green: reading up to 37.4 °C
Red: reading higher than 37.4 °C

Features

- Infrared forehead thermometer
- Ergonomically shaped design – very easy handling
- Precise, gentle and hygienic
- 30 data memory (stored with date and time)
- Multifunctional (body, object and ambient temperature)
- Sound control – silent mode option for measurements at night
- Clinically tested in Europe

IR 310

Ear thermometer with probe cover and ACCUsens guidance system

1
sec

1-second measurement

Reliable and accurate measurement of the ear temperature

ACCUsens guidance system

Confirms the right position in the ear with a “good” on the LCD display and a beep

Touch-free probe cover ejector

The hygienic and easy way to remove and discard used probe covers

Features

- Infrared ear thermometer with probe cover
- Completely safe and hygienic for use by the whole family
- Probe cover detector ensures the probe cover is well-installed for an accurate measurement
- Illuminated probe and display for easy measurements
- Silent Glow™ technology and fever alarm
- 30 data memory (stored with date/time)
- Sound control – silent mode option for measurements at night
- 20 pieces hygienic probe covers included (BPA and latex free)

NEB 310

Professional compressor
nebuliser 3 in 1

Efficient treatment

High performance system for the upper and medium/lower respiratory tract

3 in 1

3 nebulisation rates

Choose from 3 different nebulisation rates

Air flow technology

Adjustable flow rate for individual treatment

Features

- Powerful piston pump for continuous use
- Nasal washer for the treatment of upper airways
- Breath-enhanced nebuliser for lower airways
- Easy one button operation
- Suitable for all common inhalation solutions
- Hygienic and safe – accessories are washable and disinfectable
- Fully equipped with an extra soft adult and child face mask, mouthpiece with expiratory valve, nosepiece and spare filters

Baby Care

Highest comfort with
Microlife breast pumps.

BC 100 Soft

Manual breast pump

Light, easy and ultra-quiet

Allows comfortable expressing of milk anywhere

BPA free

The bottle is completely free of BPA

Ideal for newborns

Milk bottle and silicone teat are specially designed for newborns

Features

- Vacuum technology simulates natural drinking for gentle and comfortable use
- Extra comfort with 2 expressing settings
- Hygienic and safe – accessories are washable and disinfectable
- Fully equipped with 180ml milk bottle (completely BPA free) with cap, bottle stand, two matching screw plugs for bottle and a naturally shaped
- Silicone teat for easy feeding
- Easy storage and transportation with carrying bag

www.microlife.com/bc100-soft

BC 200 Comfy

Electric Breast Pump

Individual usage

Highest comfort with 10 different stimulation settings

10 different pumping modes

Helps mothers to select the most comfortable pump setting for their milk flow

Easy to use

Large illuminated display with timer display easily tracks stimulation and expressing time

Features

- Designed to mimic baby's natural sucking rhythm with 2-phase vacuum technology
- Lightweight and compact design for easy expressing at home or on-the-go
- Memory function for personalised usage
- Battery and mains power operated (with battery level indicator)
- Equipped with 180ml milk bottle (completely BPA free) with cap, bottle stand, two matching screw plugs for bottle, naturally shaped silicone teat for easy feeding, medical power adapter and carrying bag

WS 200 BT

Bluetooth® diagnostic scale

Body composition diagnosis

Reliable measurement of your body composition

Automatic transfer via Bluetooth®

Allows fast analysis of your body composition with the Microlife Connected Health+ app

ITO coating

ITO (= Indium Tin Oxide) electrode with safety glass weighing platform

Features

- Analysis of the body weight, fat and water percentage, muscle and bone mass, BMI, with active and basic metabolic rate
- Large, easy to read display
- Automatic transfer via Bluetooth® technology
- Instant weight tracking on your smartphone with "Microlife Connected Health+" app (available free for iOS and Android)
- 180kg capacity
- 100g division
- Kg/St selection

www.microlife.com/ws-200-bt

WS 100

Body fat scale

Multifunctional

Measures weight, body fat and body water

Instant on

Turn the scale on by tapping it firmly with your foot

Kg/lb/St selection

Choose between different weight units

Features

- Reliable measurement of your body composition
- Automatically calculates body fat and water percentage in function of height, age and sex
- 10 person memory
- Large, easy to read display
- Athlete mode with 3 levels of activity
- 150kg capacity
- 100g division

Professional Products

Be part of the growing
movement to prevent
stroke and heart
disease.

WatchBP technologies

Atrial Fibrillation (AF) detection

AFIB reliably detects Atrial Fibrillation (AF) during blood pressure measurement

Non-invasive central blood pressure measurement

Non-invasive, reliable method based on brachial pulse volume plethysmography (PVP) waveforms

Ankle Brachial Index (ABI) assessment

For an easy, fast and accurate assessment of the Ankle Brachial (arm) Index

Night-time measurement

- For measuring blood pressure during sleep.
- Helps to collect accurate day and night blood pressure measurements for a good overview of the daily blood pressure pattern.

Double arm measurement

The most reliable tool for determining inter-arm blood pressure differences (IAD)

Auscultatory mode

For use in e.g. elderly, obese and those with arrhythmia.

WatchBP average mode

Three consecutive measurements in a row

Flexible BPM schedule

Enables the physicians to adjust the settings of time intervals and numbers of consecutive measurements to comply with different guidelines.

SPRINT algorithm

Performing automated office blood pressure measurements (AOBPM)

Customisable measurement functions

The device can be upgraded with additional helpful features such as Atrial Fibrillation (AF) detection, central BP measurement function, Ankle Brachial Index (ABI) assessment, or Pulse Wave Velocity (PWV) screening, depending on the model.

PC connection

User-friendly software included

ESH/AHA/BIHS guidelines embedded

The 7-days-measurement program

For recording medication intake

The pill-button can be used to record medication intake or to record an "event" that could influence blood pressure level.

Brachial-ankle pulse wave velocity (baPWV) assessment

User-friendly with high reproducible cuff-based baPWV measurement method to evaluate arterial stiffness. The result is strongly associated with reference carotid-femoral pulse wave velocity (cfPWV), risk factors for arterial stiffness and the presence of arterial damage.

microlife

microlife office

Parameter	Value	Unit	Normal Range
Systolic BP	101	mmHg	90-120
Diastolic BP	58	mmHg	60-80
Pulse	113	beats/min	60-100
Pulse	63	beats/min	60-100

Additional data fields and graphs are visible on the screen, including a line graph showing blood pressure trends over time.

WatchBP Office Vascular

Professional office blood pressure and cardiovascular screening monitor

Bluetooth®

Brachial-ankle PWV assessment*

For an easy, fast, and accurate assessment of the Ankle Brachial (arm) Index

Non-invasive central blood pressure measurement*

Determines blood pressure of the ascending aorta based on the PVP waveforms to help in making a reliable diagnosis of cardiovascular risk and hypertension

Upgradeable measurement functions

Allows on-demand paid upgrades of "ABI Version" or "PWV Version" (ABI, baPWV and central BP included)

Features

- Fast, easy and accurate Ankle Brachial Index (ABI) assessment*
- User-friendly software included
- Dual-cuff design for simultaneous measurement on both arms to assess the Inter-Arm-Difference (IAD).
- Automated office blood pressure measurement (AOBPM) with implemented SPRINT algorithm
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

*Optional features

▶ Product video

WatchBP Office 2G

Professional automated office blood pressure monitor

Bluetooth®

Atrial Fibrillation (AF) detection*
AFIBsens detects AF with high accuracy (sensitivity 98 %, specificity 92 %) as demonstrated in multiple comparative studies with a 12-lead ECG

Non-invasive central blood pressure measurement*
Determines blood pressure of the ascending aorta based on the PVP waveforms to help in making a reliable diagnosis of cardiovascular risk and hypertension

Upgradeable measurement functions
Allows on-demand paid upgrades of "AFIB version" or "CBP" version (AFIB and Central BP included)

Features

- Display of Mean Arterial Pressure (MAP) and Pulse Pressure (PP)
- User-friendly software included
- Easy data transfer via Bluetooth® or USB cable
- Automated office blood pressure measurement (AOBPM) with implemented SPRINT algorithm
- Rechargeable battery pack
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

WatchBP

HOME A

Home blood pressure monitor
with Atrial Fibrillation (AF) detection

AFIB

Atrial Fibrillation (AF) detection*

AFIBsens detects AF with high accuracy (sensitivity 98 %, specificity 92 %) as demonstrated in multiple comparative studies with a 12-lead ECG

USUAL

Usual mode

In usual mode, 3 consecutive measurements are automatically performed for high accuracy

DIAG.

Diagnostic mode

7-day self-measurement program that strictly follows ESH/AHA/BIHS guidelines

Features

- 250 data memory
- PC connection and software included
- Clinically validated for children aged 12+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

www.microlife.com/home-a

WatchBP HOME

Home blood pressure monitor

Usual Mode

For single measurements at any time
(250 memory)

Diagnostic mode

7-day self-measurement program that
strictly follows ESH/AHA/BIHS guidelines

PC connectivity

Transmit measurement data to PC via
USB connection

Features

- Clinically validated for pregnancy and pre-eclampsia, diabetes, renal disease and obesity.
- Easy, reliable and affordable automated blood pressure measurement device.

WatchBP

O3 Ambulatory 2G

Professional 24-hour
blood pressure monitor

Bluetooth®

Ambulatory blood pressure measurement

User-friendly ambulatory blood pressure monitor for 24-hours blood pressure measurements

Customisable measurement functions

Customise your ABPM according to your needs with features such as central measurement function or Atrial Fibrillation detection

AFIB

Atrial Fibrillation (AF) detection*

AFIB detects AF with high accuracy (sensitivity 98 %, specificity 92 %)

Features

- PC connectivity with Bluetooth® and USB
- User friendly software for easy data analysis included
- 330 data memory for pill intake, event and blood pressure measurement recordings
- Sophisticated design to fulfil hygiene standards
- Fully-programmable
- Silent mode option
- Clinically validated for children aged 3+, pregnancy and pre-eclampsia, diabetes, renal disease and obesity

Cuffs and supplies

Cuffs, as important as the blood pressure monitor

WatchBP Rigid cuff

Rigid and conical upper arm cuff, applicable for WatchBP Office devices

Properties

- Preformed cuff for highest level of comfort
- All cuff bladders are both latex and PVC free
- Suitable for all common arm sizes
- Available size: M-L (22–42 cm)

www.microlife.com/watchbpaccessories

WatchBP Office cuff

Soft upper arm cuff, applicable for all WatchBP Office devices

Properties

- To fulfil hygienic needs in the professional setting the cuffs are washable in washing machine after removing the bladder
- All cuff bladders are both latex and PVC free
- Available in nylon and cotton
- Available sizes: S (14–22 cm), M (22–32 cm), L (32–42 cm), L-XL (32–52 cm)

www.microlife.com/watchbpaccessories

“Using the wrong size cuff is a major cause for erroneous blood pressure measurement.”

WatchBP
Office ankle cuff

Conical, soft ankle cuff, applicable for WatchBP Office ABI and Vascular

Properties

- Ankle cuff for measuring the Ankle Brachial (arm) Index (ABI) and brachial-ankle pulse wave velocity (baPWV)
- All cuff bladders are both latex and PVC free
- 170 cm tube with cuff connector
- The conical shape provides a better fit on special group patients
- Available sizes: M (22–32 cm) and L (32–42 cm)

www.microlife.com/watchbpaccessories

WatchBP
Ambulatory cuff

Soft upper arm ambulatory cuff, applicable for all WatchBP O3 devices

Properties

- To fulfil hygienic needs in the professional setting the cuffs are washable in washing machine after removing the bladder
- All cuff bladders are both latex and PVC free
- Available in nylon and cotton
- Available sizes: S (14–22 cm), M (22–32 cm), L (32–42 cm), L–XL (32–52 cm)

www.microlife.com/watchbpaccessories

WatchBP
Home cuff

Soft upper arm cuff, applicable for all WatchBP Home devices

Properties

- With metal bar for easy self-attachment
- All cuff bladders are both latex and PVC free
- Available sizes: S (17–22 cm), M (22–32 cm), M–L (22–42 cm), L (32–42 cm), L–XL (32–52 cm)

www.microlife.com/watchbpaccessories

WatchBP Analyzer Software

Compatible models:

WatchBP Office 2G; WatchBP Office Vascular; WatchBP Office ABI, WatchBP Office AFIB; all WatchBP O3 variants; WatchBP Home; WatchBP Home A; WatchBP Home A BT

WatchBP O3
